Use of a medium buffered with N-hydroxyethylpiperazine-N-ethanesulfonate (HEPES) in intracytoplasmic sperm injection procedures is detrimental to the outcome of in vitro fertilization.

Short versus long gonadotropin-releasing hormone analogue suppression protocols for superovulation in patients > or = 40 years old undergoing intracytoplasmic sperm injection.

Number of embryos transferred and implantation.

A controlled trial of natural cycle versus microdose gonadotropin-releasing hormone analog flare cycles in poor responders undergoing in vitro fertilization.

Successful paternity with microassisted fertilization after total body irradiation-based conditioning for autologous bone marrow transplantation.

Single embryo transfer

NUMBER OF EMBRYOS TRANSFERRED AND IMPLANTATION - Pierluigi Giannini, Claudio Piscitelli, Annalise Giallonardo, Marco Sbracia, Francesco Morgia, Monica Torti, Monica Montigiani, Mauro Schimberni

Follicular fluid adrenomedullin concentrations in spontaneous and stimulated cycles:
relationship to ovarian function and endothelin-1 and nitric oxide
anno pubblicazione: 2002

A rare case of ectopic pregnancy. Primary ovarian pregnancy
anno pubblicazione: 1990

Reproducibility of the indirect immunobead assay for detecting sperm antibodies in serum
anno pubblicazione: 1989

Intrafollicular changes in the peri-ovulatory period
anno pubblicazione: 1989

Incidence of multiple gestations in the presence of two or more mature follicles in the conception cycle.
anno pubblicazione: 1987

Echo-guided extraction of oocytes by perurethral-transvesical route in a program for in vitro fertilization and embryo transfer
anno pubblicazione: 1987

An immunobead assay for antibodies to spermatozoa in serum
anno pubblicazione: 1987
Mar;32(3):188-90.

Metergoline and bromocriptine in the management of tumoral and idiopathic hyperprolactinemia
anno pubblicazione: 1983

Treatment of hyperprolactinaemia with metergoline for periods up to 5 years: clinical and biological tolerability
anno pubblicazione: 1983
